

**City of Port Richey Dredging  
Dredged Material Management Area Sediment Chemistry Testing  
C2008-053-06 [Work Order #7] Progress Summary  
Page 1 of 1**

**May 2010**

<b>TASK NO.</b>	<b>DESCRIPTION/PROGRESS SUMMARY</b>	<b>APPROX. % COMPLETE</b>
-----------------	-------------------------------------	---------------------------

**INTRODUCTION**

The City of Port Richey wishes to purchase the River Gulf Road site for use as a temporary Dredged Material Management Area (DMMA). The sediment chemistry testing will help the City of Port Richey determine whether the site is useable as a DMMA.

<b>Task 1:</b>	<b>Dredged Material Management Area Sediment Chemistry Testing</b>	<b>100%</b>
----------------	--	-------------

Ardaman & Associates will collect four composite sediment samples from the River Gulf Road site from the first two feet of four core borings. Xenco Laboratories will analyze these samples for metals, PAHs, and pesticides as required under FDEP Permit 51-0238686-002.

On April 6, Taylor Engineering provided the Port Richey City Council with the Xenco's final report. This work order is complete.
