April 2010

TASK NO.	DESCRIPTION/PROGRESS SUMMARY	APPROX. % COMPLETE
-----------------	-------------------------------------	---------------------------

INTRODUCTION

The City of Port Richey wishes to purchase the River Gulf Road site for use as a temporary Dredged Material Management Area (DMMA). The sediment chemistry testing will help the City of Port Richey determine whether the site is useable as a DMMA.

Task 1: Dredged Material Management Area Sediment Chemistry Testing	100%
--	-------------

Ardaman & Associates will collect four composite sediment samples from the River Gulf Road site from the first two feet of four core borings. Xenco Laboratories will analyze these samples for metals, PAHs, and pesticides as required under FDEP Permit 51-0238686-002.

On April 6, Taylor Engineering provided the Port Richey City Council with the Xenco's final report.
